

B M JANARDHAN

AI-Driven Full Stack Developer | Python | React.js | Django | Machine Learning | AI

+91 8686909992 | Janam9097@gmail.com | [LinkedIn](#) | [Portfolio](#) | Chennai, India

PROFESSIONAL SUMMARY

AI-Driven Full Stack Developer with a B.Tech in Computer Science (Artificial Intelligence & Machine Learning) and hands-on experience building intelligent, data-driven web applications. Skilled in combining Python, React.js, Django, and MySQL with machine learning to design full-stack systems that go beyond standard CRUD functionality — incorporating anomaly detection, automated decision-making, and AI-powered automation. Experienced in end-to-end development, from model building and evaluation to interactive frontends and real-time visualization dashboards, with a focus on strong problem-solving and software engineering fundamentals.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML5, CSS3

Frontend: React.js, HTML5, CSS3

Backend: Django, Python

Databases: MySQL

AI & Machine Learning: Machine Learning, Deep Learning, Artificial Intelligence, Anomaly Detection, Model Building & Evaluation, Data Analysis

AI Application Development: Streamlit (AI-powered dashboards & interfaces), Python-based ML integration into web applications

Tools & Platforms: Git/GitHub, VS Code, Google Colab

Core Computer Science: Data Structures & Algorithms, DBMS

PROJECTS

AIOps-Driven Self-Healing Application *Python, Machine Learning, Streamlit*

- Engineered an AI-driven monitoring system that autonomously detects infrastructure anomalies using ML-based anomaly detection models, enabling proactive fault identification.
- Designed automated decision-making logic that triggers remediation workflows in response to detected anomalies, reducing dependency on manual intervention.
- Integrated real-time alert pipelines with automated remediation actions to improve incident response time across monitored infrastructure.
- Built an interactive real-time dashboard in Streamlit to visualize system health, logs, and alerts, translating ML outputs into actionable, human-readable insights.
- Combined AI/ML, backend logic, and dashboard development into a single intelligent application — demonstrating end-to-end AI-driven full-stack capability.

INTERNSHIP / TRAINING EXPERIENCE

Machine Learning Intern — Interncertify

Oct 2025

- Completed a hands-on machine learning internship, applying core ML concepts — including model building and evaluation — to practical, real-world problem-solving tasks.

Python Intern — Assistive Technology

Jan 2024

- Developed Python-based solutions as part of an assistive technology internship program, strengthening core programming and problem-solving skills.

Python Full-Stack Developer Training — FITA Academy, Chennai

- Completed structured training in full-stack web development covering Python, Django, React.js, and MySQL, building the foundation for AI-integrated application development.

EDUCATION

B.Tech, Computer Science — Artificial Intelligence & Machine Learning — Siddharth Institute of Engineering & Technology, Puttur, Tirupati Dist., India
Oct 2022 – May 2026

LEADERSHIP & VOLUNTEERING

Event Volunteer — Hackathons & Tech Fests —

2023 – 2025

- Assisted in organizing coding competitions, hackathons, and workshops.
- Supported smooth execution and engaged with 200+ participants across multiple events.

CORE COMPETENCIES

Leadership | Team Collaboration | Problem-Solving | Decision-Making | Event Management | Written & Verbal Communication | Time Management
